Celebration Is Wonderful Success

Local Happenings

Jolson Glorifies the Singing Fool!

Born to Mr. and Mrs. Paul Redd on Dominion Day a boy. A real Canadian, eh?

"Folks You Ain't Seen Nothing Yet" — Al Jolson.

Grover Corless, who is working in Stettler, spent the week with relatives here.

J. E. Clark and family spent Dominion Day at Cardston and Waterton National Park.

W. C. Stone and family returned on July 1st from a four weeks auto trip to Utah. A very pleasant time is reported.

Mr. Gatez of the Canadian Bank of Commerce is on his holidays now and Mr. Callen of High River is relieving him at the bank.

J. H. Blackmore left on Tuesday for Edmonton to mark papers. His brother Bill went with him to attend Summer School.

25 Flags were put up on Main St. by the business houses for Dominion Day. Solon Low and Harry Fairbanks were largely responsible for the display.

Mrs. W. Paris and Douglas left Tuesday morning for Portland for a two weeks vacation. Douglas is working for the Canadian Bank of Commerce at Champion.

His heart is breaking, but he must make the people laugh! He must make them cry! He sees the form of his lost child—coming toward him—arms out stretched and—

See Al Jolson in 'The Singing Fool.'

MORNING PROGRAM WONDERFUL — DESCRIPTION — LOUIS BRANDELY DESCRIBING OF MUCH PRAISE FOR ITS ARRANGEMENT

Dang! Crash! Dang! went the salutes on the square in the middle of town. People awakened suddenly from their slumbers heard the deafening report that followed, one or two windows near the square dropped out from the concussion and Raymond's big Dominion Day celebration was started.

About 8:30 a.m. the people commenced to line up for the parade, and by 9:15 Marshal T. O. King and his assistants had the half-mile line in motion over the parade route, headed by the band with Paul Redd in charge. The Hungarians section made a splendid addition to the parade with a wagon load of their own musicians, playing as the parade proceeded, and several of them wore the colorful costume of the Hungarian cowboy. The school children added greatly to the parade and the decorated cars, tractors, bicycles, etc. made the parade an outstanding success. The Great War Veterans, in command of Captain Dr. Leech carried their standard and took charge of the flag rising. The street was well decorated and as the parade moved along the flags bunting etc. on business houses and homes added that patriotic touch to it all.

Parade winners were— Hungarians representing the nations Smallie Redd and Lincoln Wood for team of Bicycles, Mildred Roberts for tricycle.

When the Opera House was reached for the program everything was in perfect preparedness and the large hall most beautifully decorated. The birth of the Dominion and Raymond in particular showing its growth and progress was very well depicted, Ray Knig of talking prominent part in the early days of the town. The scene of the strangers within our gates was very fitting, and was enlivened by a dance by a number of Hungarian residents.

Mayor Cape delivered a splendid address of welcome, J. W. Davis gave the oration of the day and the Maple Union and a mixed quartette were very effective in the singing of the program. Every number went off with dispatch and all enjoyed the program.

At the Fair Grounds the afternoon started with a league ball game with Magrath which turned out to be a batting practice, the final score being 21-12 in favor of Raymond. The rainers were all fired out for more money trips around the bases and the fans thought for awhile they would see nothing but baseball during the afternoon.

When the races started there were plenty of entrants to make the interest general and the competition very keen. Close decisions were essential on the part of the judges both in the horse and foot races.

As usual, the Opera House was crowded to the doors, everyone having a very enjoyable time at the dance.

All in all the celebration exceeded the expectations of the most optimistic and the people who labored so unceasingly to put the celebration over in such grand style are deserving of the greatest praise.

Let's get busy a little earlier next year and let people know that we are going big again, and a bigger and better day will be the result.

The annual Alumni reunion of the Raymond School of Agriculture will take place Friday July 5th Ex-Students please note.

The School Fair winners short course starts at the School on Monday July 8 and will continue until the 13.

Principal O. S. Longman, Mrs. Longman and children were Calgary visitors the first of the week.

C. O. Arplund is at the present time a visitor at Glenwood.

Weed Conference at Raymond S. of A.

A very successful weed conference was held at the School of Agriculture last Thursday June 29 with about twenty five in attendance.

Geo. Ingram occupied the chair and accredited himself nobly by his ability to answer the various complex questions re weeds, irrigation problems etc.

O. S. Longman Principal of the School welcomed the conference and said he deplored the lack of interest in conventions in this district also he assured the weed men in Southern Alberta the hearty Co-operation of this institution.

Geo. Ingram gave the first talk on Administration and organization, in this talk he stressed the point that to get anywhere a definite organization should be had and also co-operation with municipalities, U. E. A. and schools was desired.

Mr. Stephens Field Crop Commissioner followed Mr. Ingram and spoke on Legislation. Mr. Stephens stated that this was one of the dirtiest districts in Alberta, resembling the Portage Plains in Manitoba twenty years ago, and that the government was going to clean it up, he also said that conditions were hopeless. This talk on the whole was chiefly on the

Interpretation of the Noxious Weed Act.

Mr. Gaudier, principal of the Claresholm School of Agriculture, assisted by Mr. Robinson Field Husbandry Instructor of Claresholm gave splendid talks and demonstrations on the Identification of Weeds. Mr. Gaudier was at one time instructor of Science at the Raymond School and it is always a pleasure to see him back.

The next speaker was C. O. Arplund Farm Manager of the Raymond School who spoke on problem and crop rotation, he stated that the average Alberta farmer was a poor inefficient producer and to prove his point he cited the average wheat yield and the average milk production, he also claimed that as an industry Agriculture is far behind its research departments.

Mr. Perry of the Chipman Chemical Co. Winnipeg and Mr. Smith of the Atank Chemical Co. Calgary were each given five minutes and addressed the conference in a very fair manner. Mr. Stephens at this time suggested that these gentlemen get in contact with the municipalities.

Mr. Ingram and Mr. Laurie concluded the afternoons program with some very interesting remarks on the Identification of weeds.

THE WHEAT SITUATION

The marked weakness in the wheat market during the past month was caused by a combination of "bearish" factors which as usual, were given such prominence as to obscure certain developments which should have exerted a stabilizing influence. For several weeks prior to the sharpest price decline Argentina had made very large offerings; at the same time unofficial estimates of the 1923 crop were being steadily revised upward until they reached 320,000,000 bushels, the storage facilities for which are quite inadequate. Accordingly, shipments have been despatched with greater expedition than in any previous season. This movement, together with a comparatively early opening of navigation on the Great Lakes of North America (with a consequent very heavy accumulation of American and Canadian wheat at terminal points), and an obvious desire in the United States to increase exports from the abnormally large stock on hand, made an immense supply easily available to importing countries. In other words, wheat was thrown on the bargain counter. Additional factors were the favourable progress of the American new winter wheat crop, and a decline in European purchasing power as a result of severe winter weather, uncertainty regarding the German reparations problem and credit stringency. Counteracting influences which so far seem to have had little effect were (1) the fact that, while world stocks are probably 150,000,000 bushels in excess of a year ago, continued rapid consumption would bring the carryover at the close of the season to a figure not exceeding that on 1st August, 1923, by more than 100,000,000 bushels with the greater part in the United States, and (2) the unfavourable outlook for new crops in some countries. Purchases by importing countries fell off considerably early in May, but they have since been on a large scale showing that Europe has again found it necessary to draw heavily on exportable surpluses; there are also strong indications that Russia will shortly enter the market as a buyer. The new winter wheat in the United States was officially reported early in May as in such good condition as to yield, with continued favorable weather, a crop slightly larger than that of 1923, but it is still subject to damage during the next few weeks. The most significant feature, however, is that the indicated production of hard red winter wheat is nearly 40,000,000 bushels less than that harvested last year, practically offsetting the pres-

ent normal surplus of this kind of wheat, which, as we have previously pointed out is the American variety that finds the largest foreign sale. The United States Department of Agriculture has urged that less spring wheat be planted this year and it is probable that the Department's recommendation was heeded in some quarters. The European acreage of fall sown wheat, which provides almost the entire home supply, is reported as somewhat more extensive than in the previous season except in Russia, where fall planting it thought to be much less than was planned. The crops throughout a large section of Europe were subjected to severe winter weather, to which they are not highly resistant and it is almost certain that they suffered severely in some countries. Spring planting was late in Russia, the only European country where such seasonal work is important, and the prospects for the crops are regarded as poor. Dry weather has caused concern in Australia and Argentina, where field work for the next crops should be under way, and as mentioned elsewhere in this Letter, there is still cause for anxiety in respect of the lack of sub-soil moisture in Western Canada.—Canadian Bank of Commerce Monthly Letter.

JOLSON'S "SINGING FOOL" BREAK ALL PREVIOUS RECORDS

Now Playing at Capitol Theatre

Enthusiasm greater even than that which greeted Al Jolson in 'The Jazz Singer' is being accorded to him in his second Warner Bros. Vitaphone special, 'The Singing Fool' which is breaking all records for attendance at the Capitol Theatre.

The story of 'The Singing Fool' was written by Leslie S. Darrows and scenarized by C. Graham Baker. Lloyd Bacon directed. The all-star cast is headed by Betty Bronson and Josephine Dunn. Others are Reed Howes, Edward Martindel, Arthur Housman, David Lee and Robert Emmett O'Connor.

In 'The Singing Fool,' Al Jolson plays the part of a singing waiter who falls in love with a fair entertainer at the night club gets her a chance to introduce a song he has written for her and sets to a great producer, with that proviso. He afterwards marries her, only to be deserted several years later, returning when their child, the 'little feller' is dying. The story is moving and beautiful and is shot through with all the razzle-dazzle of Big Town show life.

EARLY MORNING BLAZE AT REX BARBER SHOP

Fire of unknown origin, started in the rear of the Rex Barber Shop about 2:30 a.m. Tuesday morning and while not burning very vigorously nor doing much damage by blaze, the smoke and water made a sorry looking spectacle of the interior equipment.

The fire started in the rear wall about four feet back of the water heater near the floor and burned up the wall. The varnish was blistered by the smoke all over the shop, the fittings stained and rusted by the water, and the paper on the ceiling burned.

The Fire Brigade made quick response and soon had a good stream of water playing in the building but were handicapped because of the density of the smoke and not knowing the location of the fire. It took about two hours to get the flame completely under control.

The public were there en masse, and made the usual mistake of getting in the way and telling the firemen what to do. We should remember that we have a fire brigade who will handle the here and when they want our help will ask for it.

The building is being completely repaired and re-wired and in the course of a few days will be in operation again in better condition than ever.

The mirrors are a bright and the woodwork around them is being scraped and varnished and everything will be spick and span for the customers of this popular Barber Shop and Beauty Parlor.

85 DEGREES IN THE SHADE AND BABY

It is 85 in the shade as this is being written with every prospect of being warmer. Half an hour ago a young Mother was giving her baby an airing in its buggy. Mister baby was far from happy and didn't mind letting every one know it. Mother was dressed in a cool white sleeveless dress and wearing a shady hat. Baby was wearing a hot woolen close fitting hood. He was tucked lightly in to the buggy with several layers of blanket on the top of that a nice warm wooly shawl, and although they could not be seen, it is almost certain he was wearing woollen stockings. Comparing mother's warm day out fit with baby's is it any wonder his protests were loud and long!

Baby feels the heat just as much as Mother does and suffers more because he cannot make himself comfortable. He has to wait until some one else thinks to do it.

In the summer heat baby's clothes should be the minimum. If a mother has any doubt, let her slip her hand in side baby's clothes and if the little body feels moist then he is too warm. Clothe lightly and cover lightly so that the air may circulate freely over his skin. This keeps him cool. Give him cool boiled water between feeds. He gets thirsty too during hot days.

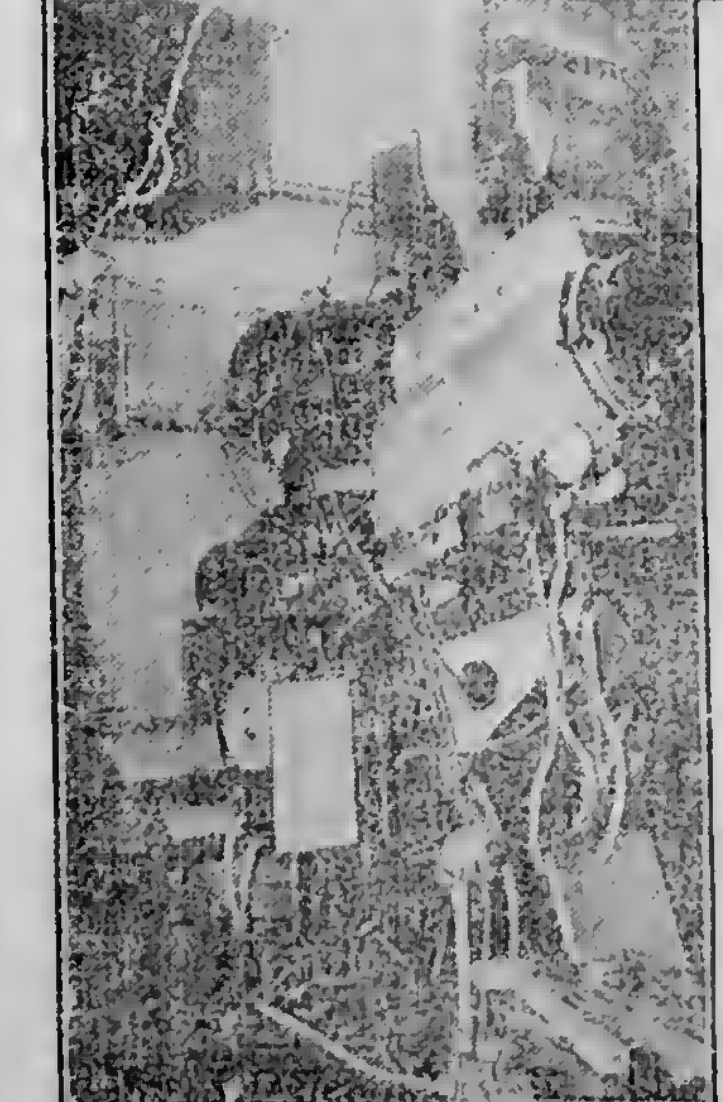

Do these things and a happy contented baby will be the result.

For "Summer care of babies" send to the Canadian Red Cross Society, 407 Civic Block Edmonton, Alta.

Jolson's great emotional genius is exerted to send audiences into wild paroxysms of excitement. There is but one Al Jolson and in 'The Singing Fool' he has found a perfect vehicle for his unique gift. The two leading ladies, Miss Bronson and Miss Dunn, are beautiful to look at and play their parts with finely contrasting discrimination. Davey Lee, who has the role of Jolson's 'little feller,' is one of the loveliest children of the screen.

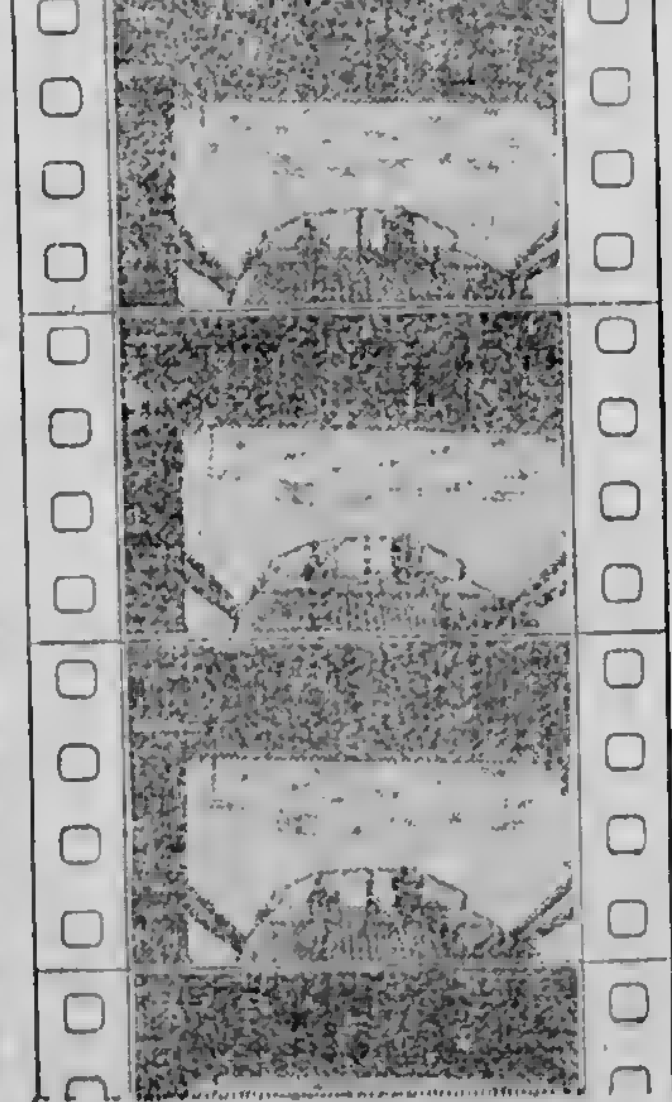

But after all, the story and the players are but the setting for the amazing Jolson—his songs and sufferings, his joys and conquests. Jolson has the distinction of having outclassed all entertainers in his first film, 'The Jazz Singer.' His second—in all but heart appeal—is 'The Singing Fool.'

Jolson Again Hits the Bull's-Eye!

With the rapidly growing popularity of the Talkies, many of the favourites of the silent drama are 'trying out' before the microphones of modern moving picture studios; some are finding that their face is not their only fortune and are now fast capturing the favour of their audiences by their voice no less than previously they did by their silent acting.

Above: We see June Collier and George O'Brien, featured in Fox films examining the electrical recording device in their Hollywood studio. Behind them is the newest thing in screendom, the Movietone Recording Truck, which the Northern Electric Company is now supplying to its Canadian licensee producers for recording scenes for their news reels in various parts of the country. Left: the sound picture projector of today is a marvel of intricate apparatus but works as simply as a sewing machine. Right: a section of sound film showing the sound track at the left which in this case recorded the sounds of an aeroplane in flight.

SPEED LIMITS

... speed limit something to abide by and pay attention to?

We have noticed in a great many towns the signs announcing a speed limit of 15 or 20 miles an hour, and when one flows down to that speed people are honking to pass and pass you up as if you were standing still. If you keep up with the crowd you find yourself going about 30 miles per hour. Raymond is about the same.

To say that speeding is dangerous is putting it mildly, but why have signs which say 15 miles per hour, and no one observing them. Put up a sign allowing a moderate speed of say 20 miles on straight streets, with 12 miles at intersections, and then pinch some of these people who are in such a hurry to get there that they endanger the lives of themselves and others particularly children, in their mad rushes.

A law that is never heeded by the public and never enforced by the officers, is worse than no law, because people breaking the law have the feeling that they are putting it over some one.

Fast or reckless driving is always dangerous, and one should drive slow enough that he can stop on very short notice at corners, blind curves, etc., and when passing other cars, be sure the dust is settled enough to make the vision clear before you "open 'er up" again.

Drivers should use a little horse sense, a little road etiquette and have a little consideration of the other fellow's position and danger, when starting to hog all the good road, simply because the other guy will let you have it. Keep to your own side of the road when rounding curves and coming over a hill especially. If you are where you belong and someone bumps into you he is to blame, not you.

As long as cars skid and roll over three or four times on a level turn, and cars crash into each other because of a cloud of dust we need to yell and carp about speed hounds and not because of a lack of road signs.

SUMMER TIME

"Mother," cried little Mary, as she rushed into the farmhouse they were visiting, "Johnny wants the Listerine. He's just caught the cutest little black and white animal, and he thinks it's got halitosis."

MEOW

Mrs. Brown—"Does your husband object to cats?"

Mrs. Smith—"He does indeed. He claims that I feed all the cats in the neighborhood. Won't you stay and have tea?"

CLEAN SEED VERSUS WEEDS

The attention of the public is being drawn, during the first week of July to problems relating to weeds. All who are interested in our agricultural industry, realize the necessity of serious losses each year through pollution of our cereal crops, and the expense connected with hauling, shipping and cleaning out screenings, consisting largely of weed seeds, is greatly reducing farm profits. The only way to profitable production is to be more resistant than the weed. Eradication is good, but prevention is better. One method of preventing the introduction of new weeds and the spread of old ones, is to sow only clean seed.

Every individual farmer is personally responsible for the seed he sows on his own land, but the Seed Act, administered by the Seed Branch, Dominion Department of Agriculture, controls the importation and sale of seed in Canada. This Act provides grades under which seed may be sold and all seed offered for sale must be labelled with one of such grades, which makes it possible for a buyer of seed to know before purchasing the seed he is securing. Freedom from weed seed is an important factor in the grading of seed. The careful farmer will insist on procuring only the highest grade of seed obtainable, as undoubtedly some of our worst weeds have been introduced into fertile land through dirty seed. The farmer can safeguard himself from getting any new weed seeds, by demanding, before purchasing seed, that he be supplied with a detailed analysis report, as issued by the Seed Branch. This report is the basis on which the grade is given, therefore such report must be in the hands of the seller of the seed and is available to those who insist on seeing same before placing orders. The sale of "Rejected" seed is prohibited and willful violators are prosecuted under the Seeds Act.

Weed seeds once introduced into our soils will, if not controlled, soon pollute our land to such an extent as to make it extremely difficult to free the soil of them. Being especially interested in that part of agriculture concerned with seed, I can not too strongly emphasize the importance and value of using clean seed.

POULTRY R.O.P. TEST HELPS INDUSTRY

Canadian poultrymen are beginning to realize the value of the record of performance for poultry under the direction of the Dominion Livestock Branch, for this method has certainly been responsible for an improvement in flocks and has done a great deal to further the poultry industry in the Dominion.

This system, since its introduction to the industry, has brought about a world's laying record, the shipping of birds and eggs to China, South America, New Zealand and many other countries, without mentioning the capturing of orders from the world-famed Petaluma poultrymen of California.

Since its inception in usefulness, volume and efficiency, and altogether 162,873 birds have been trapped, and handled according to r.o.p. requirements. Of these 59,462, or 33 per cent, have been certified, having met all requirements regarding vigor, production, egg weight, breed type, and freedom from standard disqualifications.

The report just published covering last year's work is available for distribution and may be had on application to the Publications Branch, Department of Agriculture, Ottawa. It contains the records of 33,071 birds of all the popular breeds, entered by 228 breeders in all parts of Canada, and really forms a splendid directory of breeders for those anxious to obtain stock for the purpose of flock improvements. — Market Examiner.

Welling News

(From our own correspondent)

Some of the early grain is beginning to head and all the grain and beets are looking fine. Grain would be appreciated now.

Farmers have commenced haying.

Mr. and Mrs. Geo. B. Canning arrived here from Spokane last Monday.

Mr. and Mrs. James Thomson and Mr. and Mrs. Henry Thomson returned home last Wednesday. Thursday night their sweet dreams were disturbed by a large chivvaring party. They were real sports what happened I can't say but at 1:30 Jim was still looking for his wife.

Mr. and Mrs. L. R. Workman and child ren motored to Cardston Saturday morning for a short visit with relatives. Mr. Workman does not intend teaching here next term.

Mrs. Irene Lowry has returned to her home in Taylorville.

Many people from here attended Union Meeting in Raymond Sunday after which several carloads went over to Henderson Lake.

While in Lethbridge Sheridan Schumers and Mrs. Jenny Schumers went for a ride in an aeroplane. This makes four from here to take a ride in the last two weeks.

Monday morning found people awake real early, at 4:30 a car load of men with shot guns went rousading. N arly everyone in Welling attended the parade in Raymond. In the afternoon they celebrated at home. There was a large crowd and many from other places. The afternoon was spent in running races and playing ball. Everyone participated and had a very enjoyable time. The proceeds of the day will go to help build the new church house.

John Peterson of Kinball formerly of Welling was a visitor here Monday. He was accompanied by two of his sons Harold and Douglas.

Frank Taylor and J. W. Evans were here Tuesday inspecting the beets.

The doctor's little daughter was watching liveeyed as he tested the heart and lungs of a patient. Suddenly she spoke: "Getting any new stallions daddy?"

H. R. Heyner bought a Chrysler Coupe from J. H. Ford on Friday.

Mr. and Mrs. Mayo Weir attended the dance at Waterton Park Monday night.

Louis Fisher of Missoula Mont, arrived in Raymond on Monday, and will be married to Miss Olive Parkinson of Magrath, at the Alberta Temple on Wednesday, July 10. They will leave for their home in Missoula on Saturday July 13th.

Lucy Roberts accompanied Mr. and Mrs. Jas. Melchior of Magrath in an auto trip to St. Paul, Minn., where they will meet their son, John who is a missionary there. Elder Melchior will probably return home with them by way of the coast.

Here and There

(319)

The latest shipment of live muskrats ever to be shipped from Canada, a thousand in number, were carried by Canadian Pacific Express Company from Oak Lake, Manitoba to Hamburg, Germany, recently. They were trapped in the breeding grounds on the Manitoba rat farm and shipped in boxes, each box holding twelve pairs. They were shipped on C. P. Freighter Beaverford from Montreal and the muskrats were in good condition with a minimum of casualties when they reached destination.

The Royal York Hotel, Toronto, largest hostelry and highest building in the British Empire, will be opened by His Excellency the Governor-General, June 11. The following day will be reception day for guests and the hotel is booked to capacity. The whole water front of Toronto is rapidly resembling that of New York with the building of immense structures of which this is the outstanding.

On the authority of an official report recently issued it appears that the bicycle is gaining in popularity in Canada. In 1923 production of bicycles in Canada reached a new record with the selling value of products 53 per cent higher than in 1922. Last year 27,999 wheels were sold valued at \$399,480.

Within the next few weeks the largest re-forestation venture so far made by the Ontario Government will be under way in the planting of 1,200,000 trees in the Thessalon district near the Soo. This is to be largely experimental and as a guide to schemes under contemplation for the future in different parts of Ontario.

W. E. Wilford will assume the title of purchasing agent, Canadian Pacific Railway, Toronto, according to an announcement recently given out by R. W. Roberts, general purchasing agent of the railway. Mr. Wilford will have most of the work in connection with the Royal York Hotel purchase. He joined the company as a clerk in the purchasing department in 1903.

Fourteen cases of orchids were carried from Kauland to Japan recently under the auspices of the Canadian Pacific Express Company to the order of the Emperor of Japan, the Empress and members of the Imperial Court. They are sent at from England about three times a year and are highly prized by the Japanese Royal Family and Court.

A new wheat, known as R-49, may be the long needed, rust-resistant wheat. Canadian Government plant breeders have long been experimenting in an effort to develop a variety of wheat that will resist rust and at the same time be of high grade milling quality. Hammer, which is a rough, large, rather poor-yielding strain of the wheat family, which has seemed to be rust-resistant, has been crossed with Marquis wheat and the progeny again crossed with Marquis resulting in a grain which is three-quarters Marquis stock. The plant breeders have carried on their experiments at the Manitoba Agricultural College and from as many as 88 strains developed, R-49 seems so far to be the most promising.

1817

112 years

FOUNDED in 1817, the Bank of Montreal is now in its 112th year of financial service for the people and commerce of Canada.

In every place of importance throughout the Dominion, the Bank is represented by a fully-equipped Branch. It also has its own offices in Great Britain, France, the United States and Mexico.

Its facilities in all phases of domestic and foreign banking are unexcelled.

BANK OF MONTREAL

Established 1817

Total Assets in excess of \$200,000,000

News Notes

A good rain would be very welcome now. Some crops are a bit dry.

Mrs. G. S. Brewerton of Cardston was visiting relatives in Raymond this week.

Wm. Paris and family spent Sunday and Monday at Waterton National Park.

CANADA RANKS FOURTH AMONG DAIRY COUNTRIES OF WORLD

Canada ranks about fourth among the countries of the world in the number of its milk cows, according to the latest international statistics.

United States commands the lead with a large majority, for according to the report there are some 21,948,000 head across the line. Germany comes next with 10,971,000 while the Dominion's figure of 3,792,552 in 1927 compares with 1,751,000 in Great Britain and Ireland in 1924.

The dairy industry of Canada has been undergoing such radical changes especially in its export phase, that the progress which is being made is apt to be lost sight of. This is indicated in the figures recently published for the year 1927. The total value of all dairy products in that year was \$253,736,605 as compared with \$249,710,007 in the previous year, an increase of \$4,026,598. In 1910 the value was only \$63,470,953, the increase in the little more than a quarter of a century being equal to 266 per cent.

The analyzed figures of 1927 show Ontario with 1,159,457 cows milked, producing 5,128,278,311 pounds of milk followed closely by Quebec with 1,050,506 cows producing 4,057,161,966 pounds of milk. Outstanding after these two leaders is the province of Saskatchewan with 291,692 cows milked and producing 1,049,216,124 pounds of milk.

Thereafter in order of importance come Alberta Manitoba, Nova Scotia, New Brunswick, British Columbia, and Prince Edward Island. British Columbia, however, stands out as having the highest average production in the Dominion with 5,070 pounds as against 4,423 pounds in Ontario, which ranks second. The other provinces come quite close together with average yields between 3,861 pounds and 3,210 pounds per cow.—Market Examiner.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

BABY'S FOOD

Every baby should be breast-fed. There are few mothers who cannot nurse their babies if they try to do so, and there are few who would not make the effort if they understood how important it is that the baby should have his natural food. There is no other milk, or no preparation which is just as good as breast milk. Breast milk is purer, cleaner and more easily digested than any other food, and it requires no preparation.

Mothers sometimes wean their babies because they think that they have not enough milk, or that the quality of their milk is not good. This is a serious mistake. Every effort should be made to keep up the quantity available, and it is much better for the baby that he receives some breast milk than none at all. If there is not sufficient breast milk, the necessary supplementary amount of a nutritious food is given after the nursing according to the feeding formula given by the physician.

The baby should be fed at regular intervals. Not only is this desirable from the standpoint of his digestion, but it is important as the start of proper habits in the child. If he is asleep at nursing time he should be awakened, and he should not be allowed to fall asleep while he is at the breast. The feeding takes from ten to fifteen minutes. After feeding, the baby should be held up over the shoulder in order to allow him to get rid of the air which he has swallowed.

During the hot weather particularly the fact that babies become thirsty should not be forgotten, and the baby should be offered cooled water, previously boiled if there is any question of purity, between feedings.

Under ordinary conditions, the baby is nursed for eight or nine months; longer periods are not good for the child. The baby should not be weaned excepting upon advice of the doctor who will advise as to what diet he is to receive. As a rule, babies are not weaned during hot summer months.

Breast-feeding makes for stronger, healthier babies, and it protects them from the danger of disease. Artificial feeding, even of the highest quality, is, at the best an attempt to imitate the natural feeding. Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by correspondence.

FOR SALE CHEAP—A real good Electric Iron. See it at the office of the Recorder.

LOST—A neck fur at the Fair Grounds. Reward offered. Notify Mrs. I. E. Roberts.

HELP WANTED—The Realsilk Hosiery Mills require a resident part-time or full time representative. Write Branch Manager, 8 Wells Block, Calgary.

NOTICE

At the request of Mrs. T.-M. Carlson the U. F. W. A. Meeting has been postponed until July 11th.

2 J. 5.

Here and There

(335)

Four hundred thousand babies have been born at Banff during the last fortnight. It is not the fine mountain air that accounts for this phenomenon, but the mountain water, and the babies are rainbow trout from the Dominion Government Fish hatchery on the banks of the Bow River. They will be placed in the lakes and streams of the Rocky Mountain Parks.

Canadian Pacific Railway Police, Ontario No. 1 team, are champion revolver shots of the Dominion. After winning the Chief Constables Association Trophy in May, the team shot against the Lethbridge detachment of the Royal Canadian Mounted Police which had won the championship for Military forces, and defeated them 1412 against 1370. Possible score was 1500. The victorious team is composed of Investigator E. O'Brien, Sudbury; and Constables H. H. Gyves, Port McNicoll; J. H. B. MacDonald, Toronto; D. Prendergast, Sudbury, and W. E. Tingman, White River, Ont.

With a population that ranks 23th among the countries of the world, Canada is fifth in total exports and third in total turnover of trade.

Charles Olsen and Raffaele Malullari, rival round-the-world racers, are trying to make a trip circling the globe in less than 30 days using only "regular means of transportation." Olsen left Victoria on Canadian Pacific greyhound Empress of Asia June 13, and Malullari arrived at Vancouver on the Empress of France June 22. Airplanes come within the term of the contract since both men have already used them. The race at time of writing is very close.

A problem that has defeated the learned for centuries—the squaring of the circle—has apparently been solved by L. W. Hartman, Canadian Pacific Railway timekeeper at London, Ont. Hartman claims he devised a geometric method by which to reproduce the exact area of a circle in the shape of a square. University professors are now examining his solution. He was born in Rumania and never saw a college, but speaks English, French, German and Rumanian fluently.

Adelard Goulet, head barber of the Banff Springs Hotel, had what he regards as a close shave the other day when he was off duty on the golf links and met a black bear. He topped his drive and the bear bent a hasty retreat. Wild animals are very tame in this district this year.

Of the 2,759,000 acres taken up by settlers in Canada in 1928 eighty per cent. was in such northerly districts as Prince Rupert, Saskatchewan, and the Peace River district, Alberta. The migration northward was most pronounced in the Peace River region, where 4,000 homesteads were taken up last year. In this district, there are still available 40,000,000 acres of fertile land, capable of adding millions of dollars to the annual value of the Dominion's crops.
